

AUTOMATED FUELING TRAILER

- Equipped with a 1000 gallon clear diesel tank

- 300 gallon def tank

- Pinnacle also provides a 10,000 gallon bulk tank on site for dyed diesel

- Our mobile command trailer is equipped with a 40 kw, tier 4 generator
- Our system utilizes a quick disconnect system for easy back up plug and play

SCADA PANEL

- Three points of control in the control room, either PLC screen on 27 inch monitor, from a tablet, smart phone, or from your desktop

- Team viewer to allow access to companies to view flow rate remotely

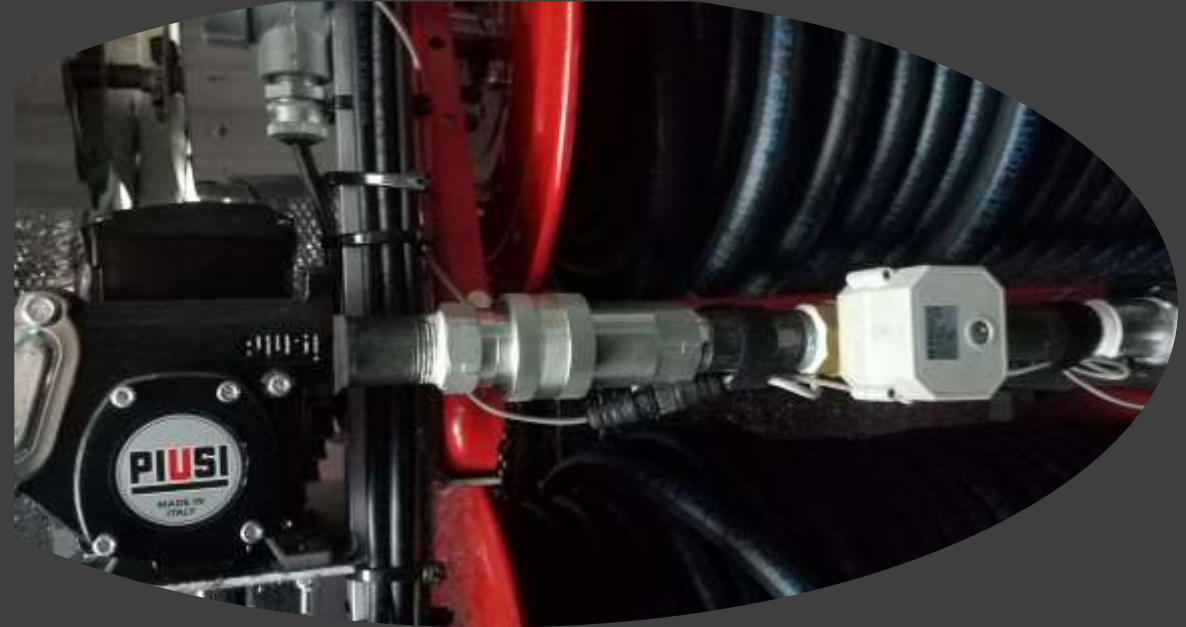

- Full print-reports onsite for flow rates on each hose reel

- We feature a reel system that will fuel up to 22 frac pumps automatically with dyed diesel fuel
- Each reel is equipped with a 328 ft 3/4 in-fuel line (winter grade)
- Flow rates of up to 7 gallons per minute per hose (420 gallons/hour)

- Each reel is equipped with electric ball valves and K24 flow meters. Our operators can monitor the hose reels on the frac pump to frac pump bases. We are also able to print or email fuel flow rates of individual frac pumps from our mobile command trailer

- Our mobile command trailer is equipped with a 3 inch flow meter to accurately measure total fuel dispensed

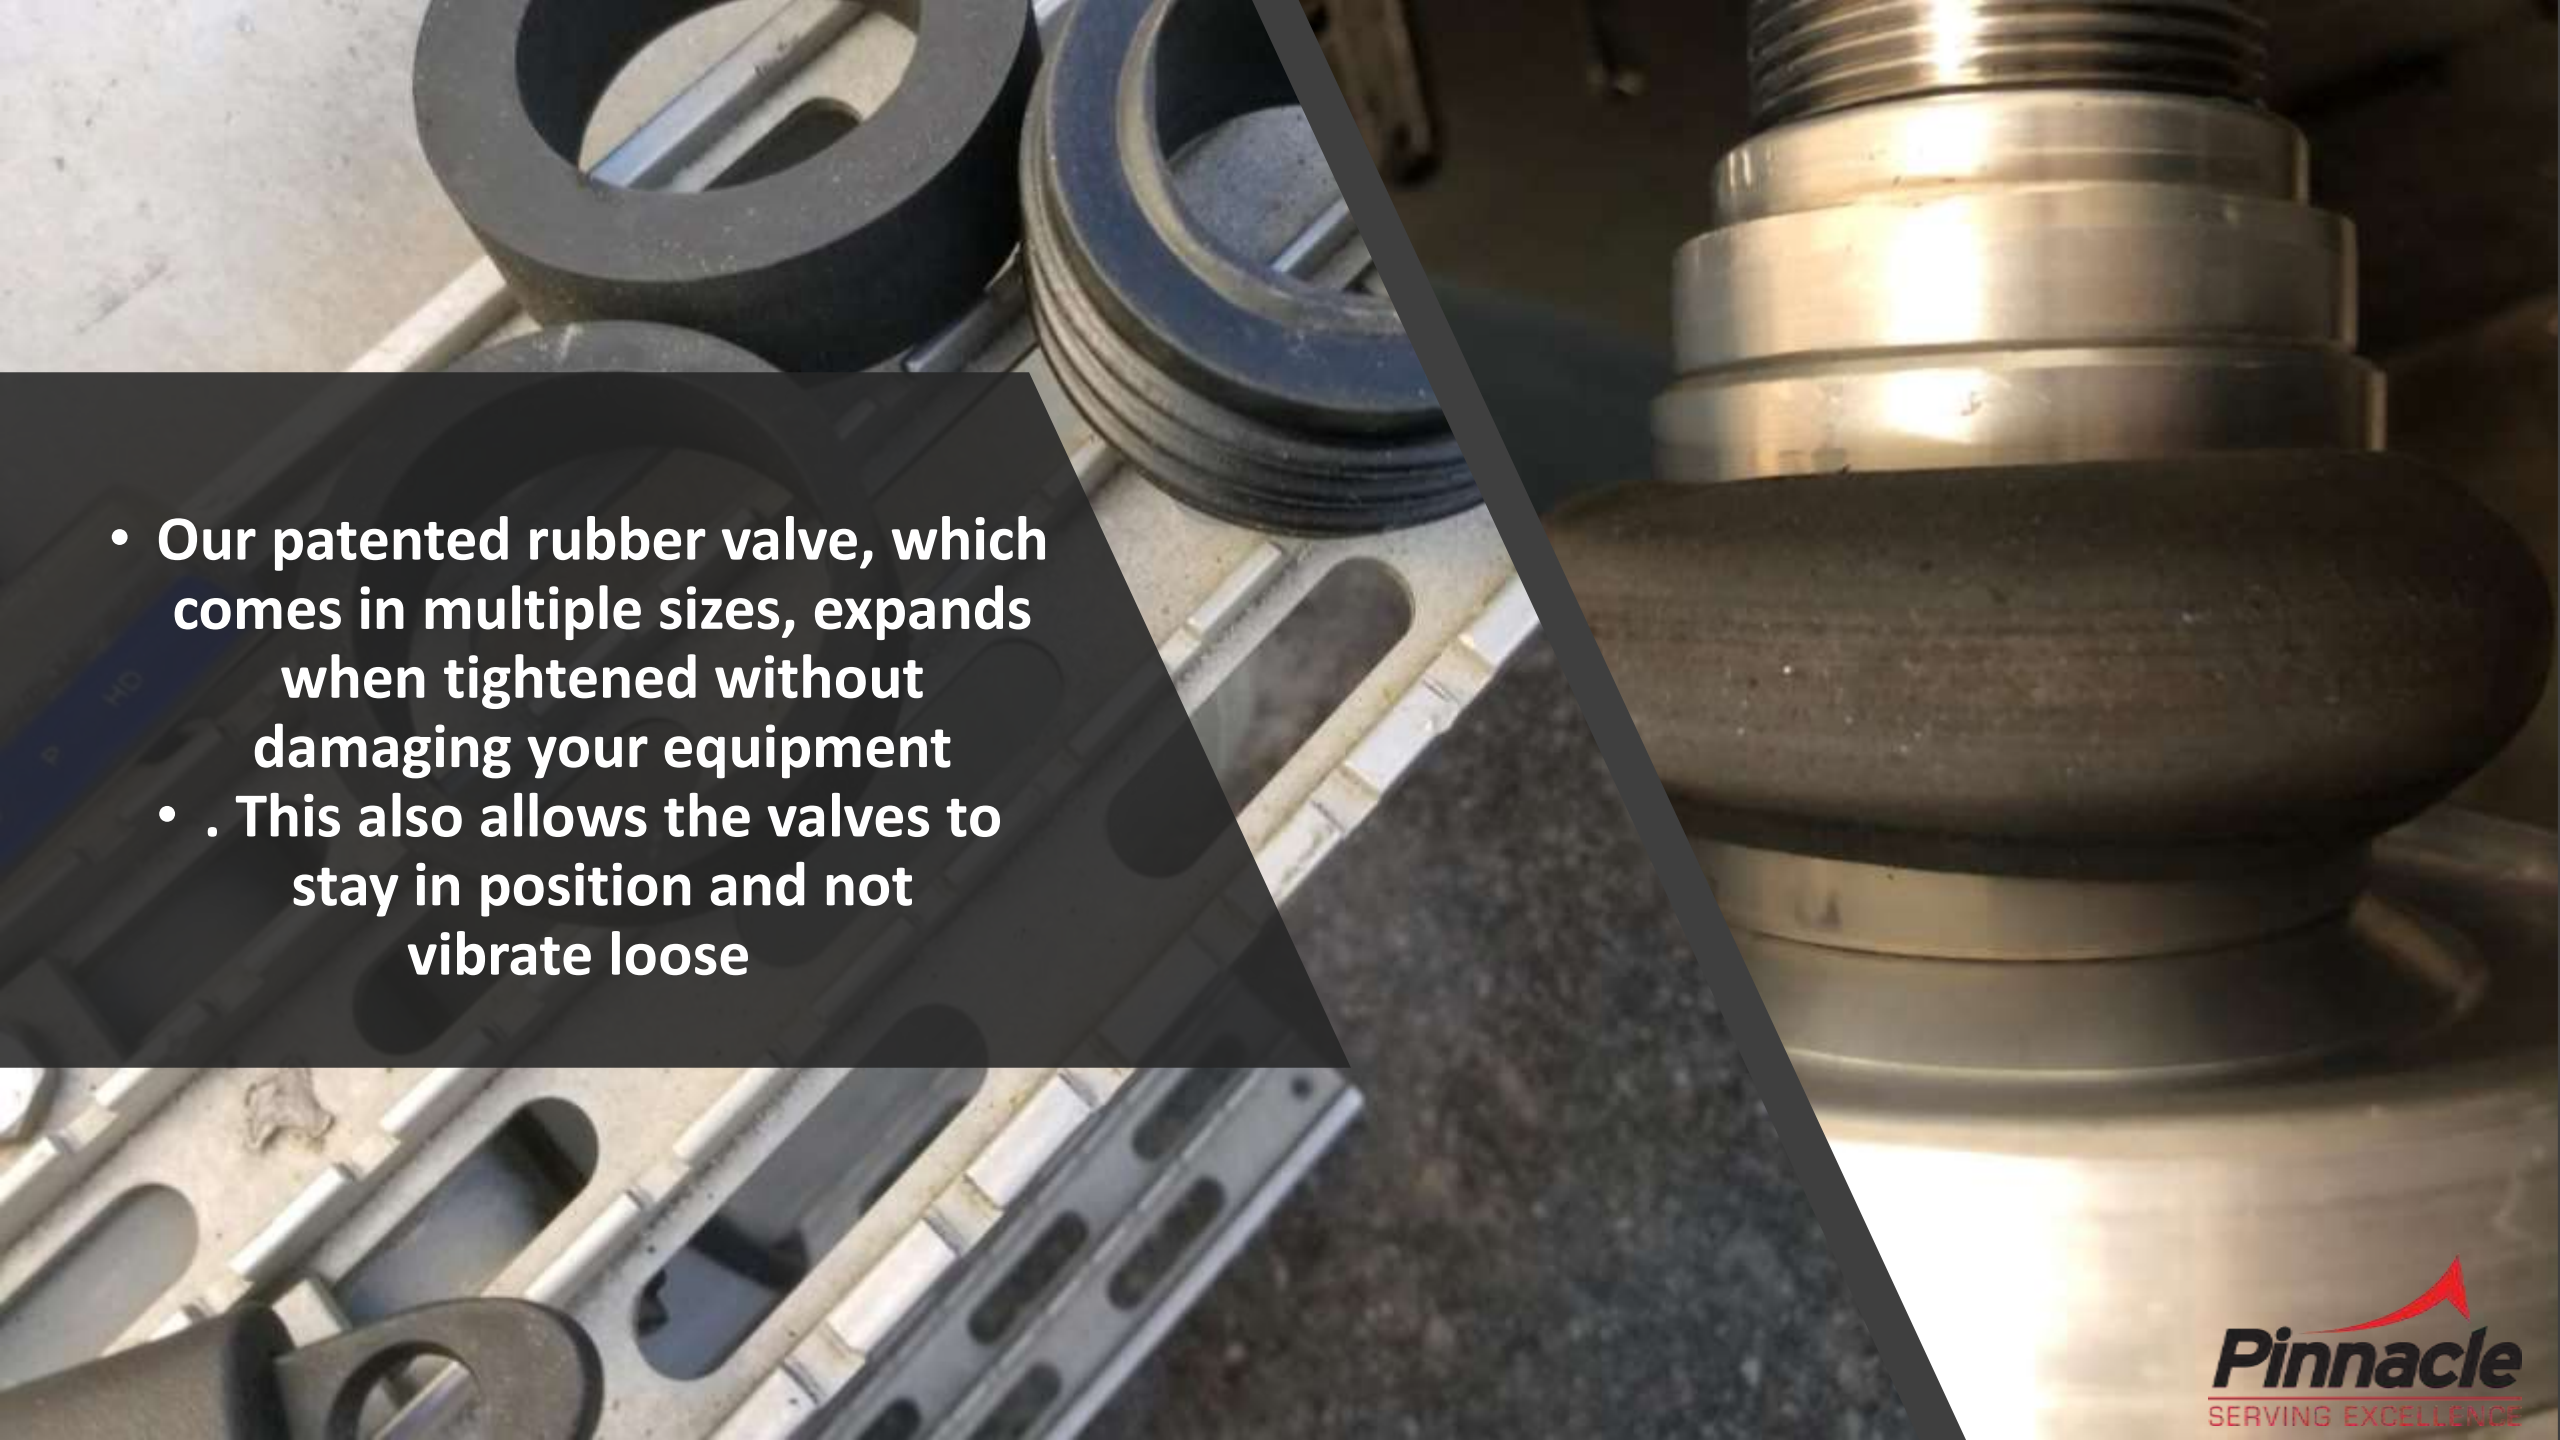

- The mobile command trailer is equipped with identical redundant pumps, each which can fill your frac site tanks at 154 total gallons per minute

- Pinnacle's patented system uses accurate weight technology to measure the weight of the fuel, rather than unreliable floats that move up and down

- 
- Our patented rubber valve, which comes in multiple sizes, expands when tightened without damaging your equipment
 - . This also allows the valves to stay in position and not vibrate loose
